**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below for clarity. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the title: The title has been changed as follows:

-- Soft magnetic composite powder comprising an inorganic insulating coating, production method of the same, and production method of soft magnetic compact --

In the claims:

Claim 26, line 1, after "The", the phrase "soft magnetic composite powder" has been deleted and replaced with: -- method --.

*End of Amendment.*

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: None of the prior art references, particularly the Japanese patent JP 11-256,202 (JP'202), teach or suggest a soft magnetic composite powder in which the surface of a soft magnetic powder is coated with an electro-insulating material, which material contains an inorganic insulating material wherein the surface of the inorganic insulating material is fusion-bonded with a resin material in such a way that the electro-insulating material partially covers the soft magnetic material powder. The soft magnetic composite powder taught in the JP'202 is completely covered with glass particles and a resin powder by mixing all three components together and resulting in the soft magnetic powder bound with the resin (paragraph 0008 and 0010]. No suggestion of surface-fusion between the inorganic insulating material and the resin is present in the JP'202. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
